

To whom it concerns,

ADCO Contracting & Civil Engineering were appointed as the main contractor for the Glanbia headquarters fit out on Ring Road, Kilkenny. The Project value was approx. €1M including mechanical, electrical and data works.

The design was modern and contemporary, high end with attention to detail especially on internal finishes. We found ADCO to be an extremely competent contracting firm from Senior Management down to site based management.

On appointment we were very impressed in the way they set about the task. We found the entire team very pro-active, they always demonstrated a can do approach. From start to finish the ADCO project team were in constant consultation with our design team and as a result the project was carried out in a smooth, efficient and professional manner.

We were very pleased with the end result and with the performance and professionalism carried out throughout the program of the project. The appointed team worked with flexibility and efficiency leading to a completion within budget.

We would have no hesitation to highly recommend ADCO to any construction entity, due to quality of craftsmanship, attention to detail, and professional staff and I have already expressed my desire to have ADCO tender future projects with Glanbia.
