**FIT -OUT FOR A CONSULTATION SUITE
FOR
THE WOMEN'S HEALTH GROUP
AT
AYRFIELD MEDICAL CENTRE, KILKENNY.**

MRC Design LTD was appointed to design and oversee the above project in 2013 by mutual clients, The Women's Health Group Kilkenny.

The design of this new facility was contemporary, high end with attention to detail, especially in relation to internal finishes and etching the new external works into the existing fabric of the main building. It was realised at an early stage that in order to fulfil the design aspirations, a competent experienced building contracting firm would need to be appointed. We were pleased when the contract was awarded to **ADCO Contracting & Civil Engineering Ltd** as we were confident that they had the necessary experience and personnel to deliver the project.

On appointment, we were very impressed in the way they set about the task. From start to finish, the appointed **ADCO** project team were in constant consultation with our design team and as a result, the project was carried out in a smooth, efficient and professional manner. The appointed team worked with flexibility and efficiency leading to a completion within budget costs and on time. Our experience was highlighted by an enjoyable relationship with a thoroughly professional and courteous team, which is an invaluable asset in the completion of any project.

I would have no hesitation to highly recommend **ADCO Contracting & Civil Engineering Ltd** to any construction entity, due of the quality of craftsmanship, attention to detail and extremely professional staff.

Yours sincerely,

Michael Condon RIAI(t)
