RE: ADCO Reference

To whom it concerns,

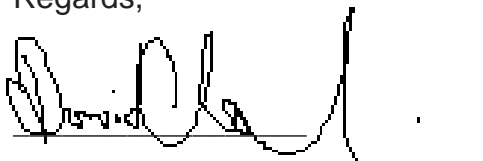

ADCO have completed a number of projects over the past few years at our ClearStream facility in Enniscorthy, Wexford. The projects varied from fit-outs to equipment installation in live production areas.

The ADCO team at all times demonstrated a commitment to meeting and exceeding the brief throughout the projects, in terms of attention to detail, quality of work, and commitment to budget and programme.

We found them very pro-active in value engineering suggestions and always found them easy to deal with in terms of agreeing final accounts and variations.

Clearstream were extremely happy with the finished projects and with the professionalism consistently displayed throughout the work. We would have no hesitation recommending ADCO for future projects.

Regards,

David Clerkin
