Re: Mr. Michael Foran - ADCO Construction Ltd

We wish to confirm that both directors of Freeman Keane Associates have worked with Michael Foran over the past 5 years in various capacities. We first met Michael when he was employed as a Contracts Manager in P. Elliott & Co Ltd. Most recently we worked with Michael in his role as Managing Director of Walsh Maguire & Co Ltd.

We have always found Michael to be very professional in his approach to any development entrusted to him. His attitude is very much *"get the job done and get it done on time and to the highest quality"*. He is extremely driven and appears to enjoy his work and the challenges posed to him. We have been very impressed by his *"nothing is impossible"* approach to construction projects.

Having worked in both Project Management and Quantity Surveyor roles on developments in which Mick was involved, we can say that we have found him to be very pro-active in driving cost and value engineering and in agreeing variations and final accounts to the mutual satisfaction of both Client and Contractor.

Finally, Freeman Keane Associates will have no hesitation supporting Michael in his new company, ADCO Contracting & Civil Engineering. We have already proposed him to a number of our clients for forthcoming construction projects.

We wish him great success with his new venture.

Please feel free to contact me at the number below, for any queries you may have.

Yours sincerely,

Mr. John Keane ASCS MRICS
Director

Mr. John Freeman ACIOB
Director
