RE: MICHAEL FORAN

To whom it may concern,

I wish to confirm that Atkins worked with Michael Foran and his team on the construction of a 5 storey over basement mixed use residential and retail Waterfront development on the Drumcondra Road, Dublin. The project incorporated the construction of a new secant piled basement car park and river wall on the banks of the river Tolka. The superstructure comprised of a 5 storey insitu reinforced concrete frame with infill stone and masonry panels. The construction team delivered a high quality product, displaying excellent due diligence and pride in workmanship throughout the course of project.

In this regard I would have no hesitation in recommending Michael Foran and his new company for any future projects. Please feel free to contact me if you require any further clarification or information.

Yours faithfully,
For and on behalf of Atkins,

Justin Norman
Associate Director of Engineering
Atkins
